

Delivery Statistics Report (2011 Births) Walla Walla General Hospital*

Walla Walla, WA Walla Walla County
Perinatal Level of Care: Level 1 Non-CAH

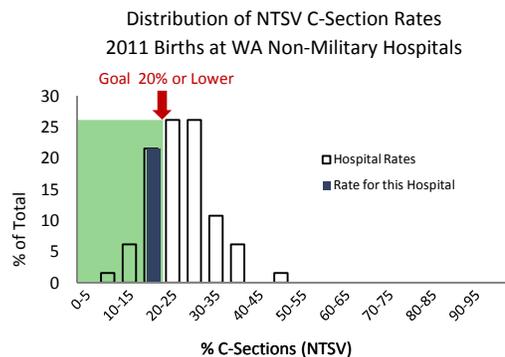

Deliveries and Medicaid Status

	2009	2010	2011	3-year TOTAL	Net Change '10 to '11
Total Deliveries	187	185	191	563	6
Deliveries with Medicaid-paid Maternity Care	144	137	133	414	-4
Percent Medicaid Deliveries	77%	74%	70%	74%	-4%
Percent Medicaid for Deliveries in this County	67%	60%	64%	64%	4%

C-Sections Among Nulliparous Term Singleton Vertex (NTSV) Deliveries

GOAL: decrease C-sections among NTSV deliveries to 20%

	2009	2010	2011	Net Change '10 to '11	3-year
NTSV Deliveries	53	55	66	11	174
NTSV C-Section Rates					
Rate for this Hospital	9.4%	21.8%	15.2%	-6.7%	15.5%
Level 1 Non-CAH Hospitals	24.1%	26.4%	24.7%	-1.7%	25.0%
Hospitals Statewide	26.7%	26.6%	25.8%	-0.8%	26.3%

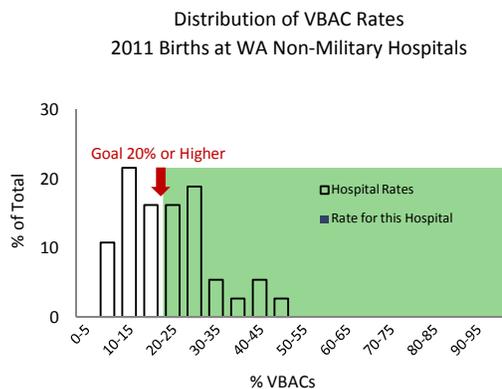

This hospital's 2011 NTSV c-section rate of 15.2% was lower than the statewide goal of 20%.

Vaginal Births After Cesarean (VBAC) for Term Singleton Vertex Deliveries

GOAL: increase vaginal births among appropriate candidates with one prior C-section to 20%

	2009	2010	2011	Net Change '10 to '11	3-year
Deliveries Post-C-Sec	13	12	8	-4	33
VBAC Rates					
Rate for this Hospital	0.0%	0.0%	0.0%	0.0%	0.0%
Level 1 Non-CAH Hospitals	18.2%	14.6%	11.7%	-2.9%	14.9%
Hospitals Statewide	16.7%	17.7%	19.7%	2.0%	18.1%

This hospital does not provide planned vaginal birth delivery services after a prior cesarean section.

DATA SOURCES: Certificates for live births and fetal deaths provided by the DOH Center for Health Statistics and included in the First Steps Database. Medicaid status was determined by individual-level linkage to Medicaid claims and eligibility performed by the First Steps Database. Perinatal Level of Care designations are per DOH licensing as of December 2010. **2011 birth data are preliminary.**

Excludes births in military facilities. C-Sections NTSV exclude cases where mother was transferred to higher level care for maternal medical or fetal indicators for delivery, or hospital births where intended place of birth was other than hospital.

Total Deliveries includes live births and fetal deaths after 20 weeks' gestation. **Medicaid** refers to births to women who received Medicaid-paid maternity care. **C-Sections (NTSV)** is the percent of cesarean sections among nulliparous, term, singleton, liveborn, vertex deliveries. **Vaginal Births After Cesarean (VBAC)** is the percent of vaginal births among live births to appropriate candidates. Women whose pregnancies were at term, had a single fetus with vertex presentation, and who had one prior c-section were considered **appropriate candidates for VBAC**. Number of prior c-sections is determined by longitudinal linkage and may undercount c-sections performed in other states or for other births not in the source data. **Chart** comparison VBAC Rates are limited to hospitals that offer planned vaginal birth delivery after a prior cesarean section (VBAC).

Goals for Washington State were adapted from national goals in Healthy People 2020, see: <http://www.healthypeople.gov/2020/topicsobjectives2020/objectiveslist.aspx?topicid=26>

* Hospital does not offer planned vaginal birth delivery services after a prior cesarean section.
