

**Health Home Program  
Dashboard Report  
May 2016**

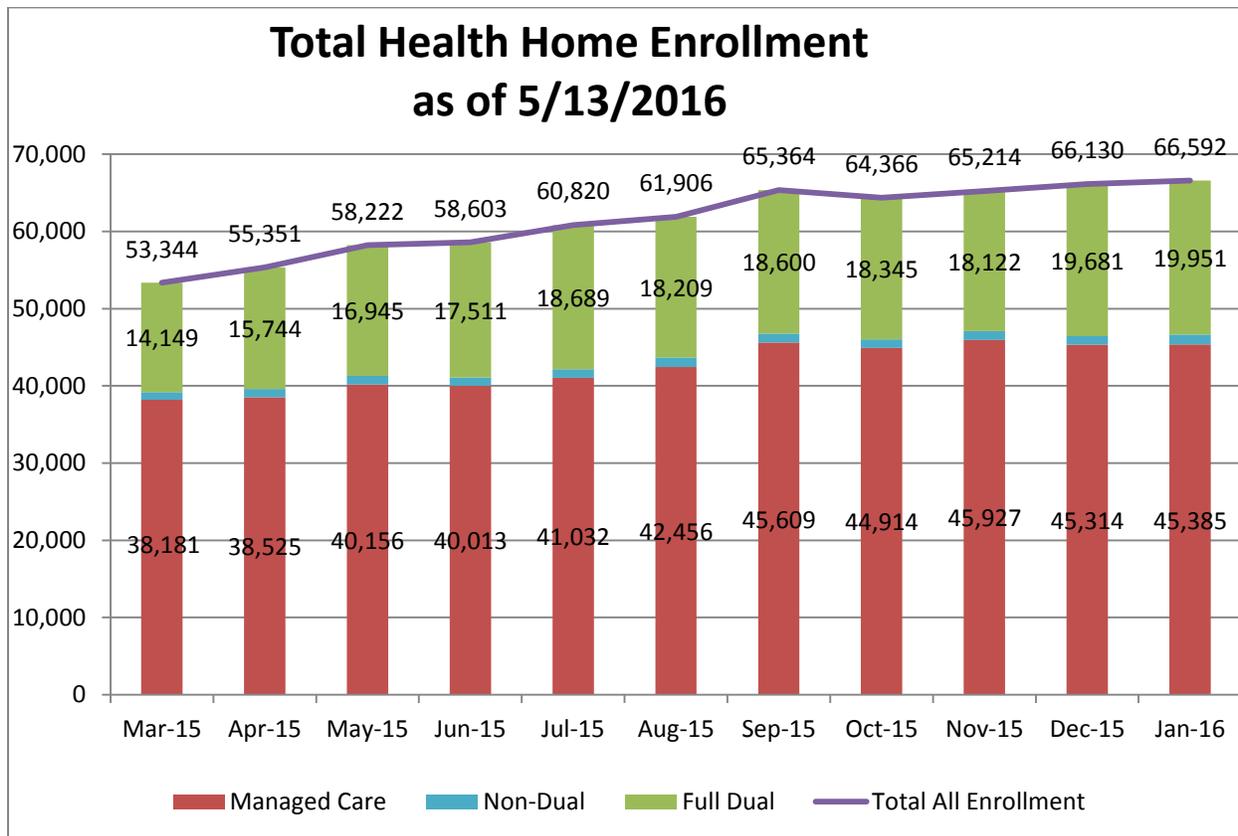

**Enrollment and Encounters** – Enrollment and accepted encounter data (engagement) was pulled on May 13, 2016 with only enrollment and dates of service prior to February 29, 2016 reviewed.

**Enrollment –**

Managed Care: All newly identified Health Home eligible clients are enrolled monthly.

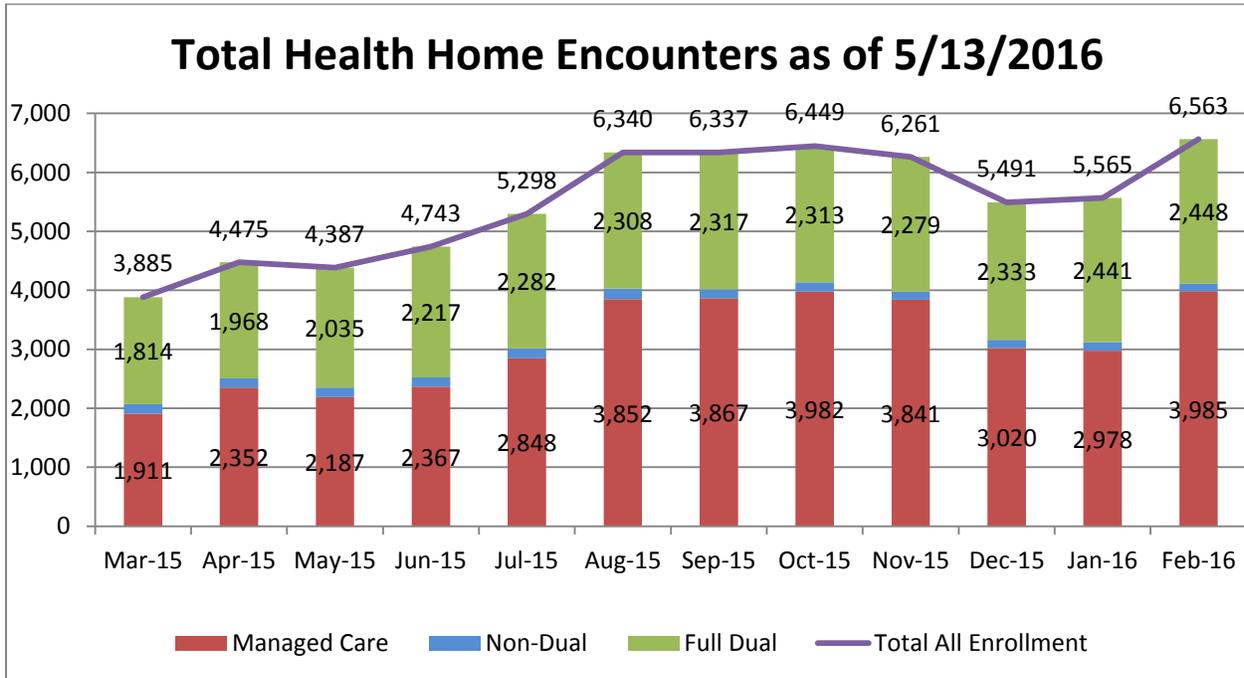

Fee-For Service: Passive Health Home enrollment of Medicare Dual and Medicaid only fee-for-service clients was temporarily halted between the July and October 2015 enrollment cycles due to the uncertain future of the Health Home program. During the October enrollment cycle all identified Dual Medicare/Medicaid clients were processed for enrollment, successfully catching up the enrollment process.

**Health Home Program  
Dashboard Report  
May 2016**

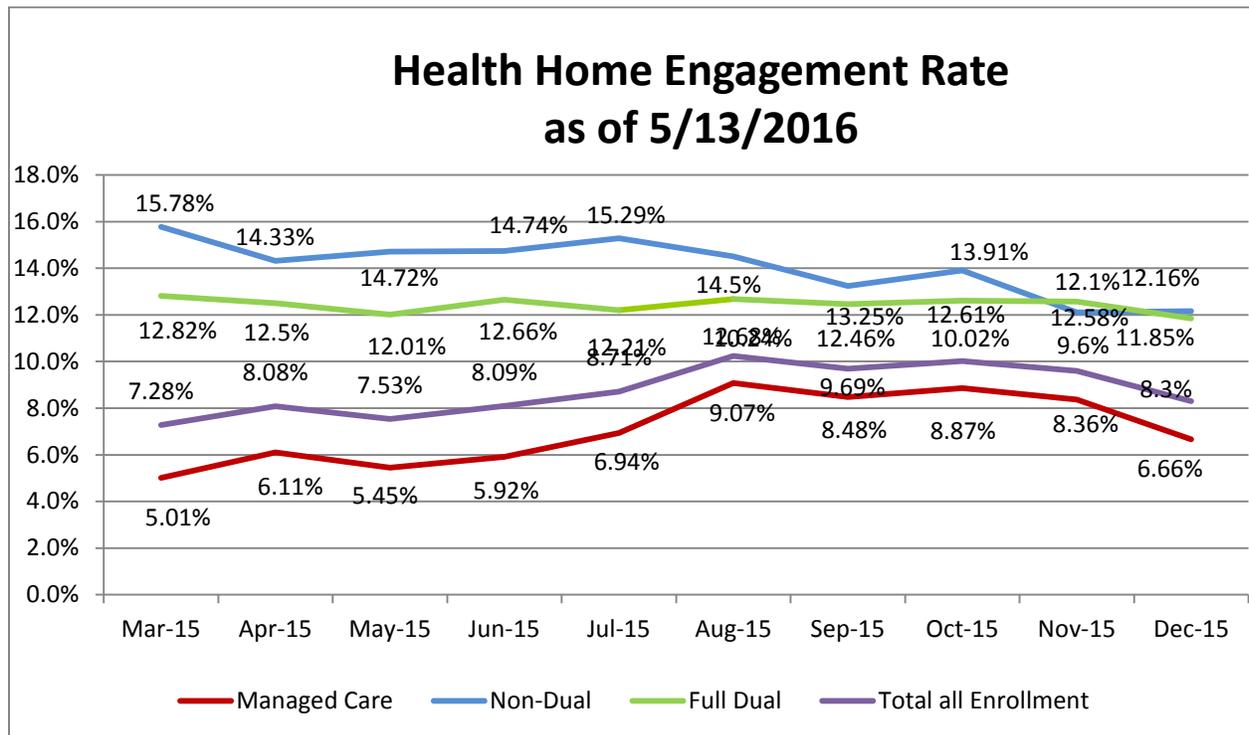

**Encounters** - Only accepted encounters are included in this report. The accepted encounters are charted by date of service.

**“Engagement” Rate** – The engagement rate in the chart below was calculated by dividing the number of encounters accepted for Health Home services rendered during a month by the total number of clients enrolled in the same month.

Note that there is an anticipated time lag between a service being rendered and the encounter being accepted by in the ProviderOne system. The engagement rate for the last six months will increase as encounters are submitted and accepted.

A breakdown of the above information, by billing entity, can be seen in the Health Home Enrollment and Encounter table.
